ALNOOR UNIVERSITY

The 2nd International Conference on Medical and Health Sciences

Prof. Dr. Yaseen Taha Al-Hajjar
Alnoor University President

Alnoor University is committed to holding significant scientific activities in pursuit of supporting scientific research and achieving higher education goals. Direct encounters during these events strengthen the connection among researchers from various institutions and academies, as well as enable the exchange of experiences and exposure to different experiments by their peers.

Today, we are hosting the second edition of the university's International Scientific Conference, which focuses on medical and health sciences. This edition aims to present research that contributes to solving existing medical problems or proposes new medical and health systems that enhance human well-being. The conference committees have received a large number of research submissions (more than 150 researches' abstracts), and it has an international scope, allowing for the intermingling of experiences among specialists from numerous countries.

A suitable number of research papers have been selected to be presented or displayed as posters. I hope for the conference's success through the combined efforts of all involved.

May God grant us success,

Professor Dr. Yasin Taha Al-Hajjar
President of Alnoor University
